## ABOUT US

Who we are ?

**As IYS TEKNİK, we are an extensive and leading company offering geotechnical solutions to many customers around the world and producing geosynthetic materials with our long years of experience since the date of our incorporation.**

Our company that has 100% Turkish capital produces, applies and sells geosynthetic products that are used in many projects both in Turkey and abroad.

We offer cost-effective and nature- friendly engineering solutions with out experienced professional teams and geotechnical designs.

We offer wide range of products reducing environmental impact of a project while providing economic advantages to our customers with our long-lasting commitment to the environment and highly- qualified staff.

Our products with CE certificate achieved 100% Customer satisfaction and they are produced with the state-of-the-art technology.

Our environment-friendly solutions are used for road construction, slope changes, erosion and sediment control, water management and containment.

Our goal is to become a world-class company that is committed to offer extensive, reliable and high-quality services and solutions to our customers.

We will continue building a solid reputation with the renowned references based on our commitment to provide high-quality products with innovative supports and solutions by taking support of our executives and employees.

## OUR MISSION

Our mission is to become a company meeting expectations of employees and customers at the highest level, showing commitment to economic and moral principles, valuing the environment, individuals and the society in the sector where we carry out our activities.

## OUR VISION

Our vision is to combine our state-of-the-art products with our professional staff, take a role in many projects and keep the customer satisfaction at the highest level as a model setting company that shows extensive presence and is selected for each and every project.
